Letter of Intent and Previous Work

D.Gueorguiev, 6/16/2023

I am looking into an implementation of semantic simulation mechanism

using reinforcement learning. Here are my preliminary notes on the semantic simulation process:

https://github.com/dimitarpg13/aiconcepts/blob/master/docs/OnTheNeedofDynamicSimulationWhen ModelingInteractionsOfSemanticStructures.pdf

https://github.com/dimitarpg13/aiconcepts/blob/master/docs/ModelingAttractiveRepulsiveForcesInSemanticProperties.pdf

https://github.com/dimitarpg 13/aiconcepts/blob/master/docs/Reinforcement Mechanism In Semantic Structure Models.pdf

https://github.com/dimitarpg13/aiconcepts/blob/master/docs/SemanticTemplates.pdf https://github.com/dimitarpg13/aiconcepts/blob/master/docs/PracticalExamplesUsingSemanticSimulationWithRL.pdf

Additionally, my interests include mathematical modeling via

convex and combinatorial optimization, graph theory and dynamic programming algorithms. Interested in using probabilistic methods for creating suitable estimators and root cause analysis.

Here are few repos representing my interests in those topics. All these repos are work in progress and will be updated periodically.

https://github.com/dimitarpg13/reinforcement_learning_and_game_theory

https://github.com/dimitarpg13/graphs_and_dynamic_programming

https://github.com/dimitarpg13/probabilistic machine learning

https://github.com/dimitarpg13/learning_bayesian_networks/blob/main/docs/LearningBayesianNetworks part1.pdf

https://github.com/dimitarpg13/root_cause_analysis_and_model_checking

https://github.com/dimitarpg13/transformers_intro

My coding experience involve python, C++, C, Java.

Here are samples of my C++ code from past endeavors:

https://github.com/google/or-tools/compare/stable...dimitarpg13:ortools:
